

LIFE IS FOR SHARING.

Telekom CR-facts

“IT remarketing” project

Our “IT remarketing” project involves reconditioning our used IT hardware to make it suitable for further use. We continue to maintain our partnership with “AfB gemeinnützige GmbH”, which offers job opportunities to people with disabilities. Within the scope of this partnership, we will give some of our used IT hardware (e.g. laptops) to the organization in the future for reconditioning and reselling. This will not only help us save resources but also create jobs for people with disabilities as well as extend the life cycle of our used hardware.
