## **Commitment to the Diversity Charter**

The Diversity Charter is an independent economic initiative that is supported by around 3300 companies and institutions in Germany. Its goal is to promote the recognition, appreciation, and inclusion of diversity in everyday working life in Germany, creating a work environment that is free of prejudice. Deutsche Telekom is a founding member of the initiative.

As in past years, we participated in the seventh nationwide German Diversity Day in 2019. In addition to a conference with around 150 managers from partner companies in the Rhine-Ruhr network participated, the Deutsche Telekom headquarters in Bonn hosted a exhibition with fact, figures and statements from Board Members and employees to show how diverse DTAG is.
