Collaboration for the protection of minors

We want to create a safe and positive online experience for children and young people. We offer them attractive, exciting content on age-appropriate websites. Supporting standardized child protection offers

We became a member of the non-profit organization JusProg e.V. in 2016. Its software protects children and young people on the internet by blocking certain content.

This software has been officially recognized as a general child protection program in Germany in accordance with statutory requirements (JMStV). The software was most recently evaluated in March 2017.

We donated the rights to the program codes behind our child protection software (Windows) and our child protection app, Surfgarten, (iPhone/iPad) to JusProg e.V. Commitment to FSM

We are a founding member and part of the executive board of FSM, the Association for the Voluntary Self-Monitoring for Multimedia Service Providers. The association published the “Index for Youth Media Protection” for the first time in 2017. The 2018 youth media protection report specifically addressed teachers and educational specialists.
